

BLUE SKY™

Odor Counteractant Floor Finish

Removes Odors
Product #10

PRODUCT DESCRIPTION

With Blue Sky, Perma has developed a more effective and economical solution to odor problems by utilizing a proprietary floor finish formulation which actively bonds with odor molecules brought in contact with the finish by the continuous circulation of air in a room or corridor. This special finish simply removes odors from the air, leaving any area smelling clean and odor free.

Field testing in nursing homes and hospitals indicated that even the most difficult to handle odors are completely eliminated for 30-45 days without any additional treatment. This period can be extended by maintaining Blue Sky with Sunrise, Perma's odor counteractant neutral cleaner.

APPLICATION & MAINTENANCE

Best results are obtained when the finish is applied to surfaces which are 60° F or warmer. Remove old finish or wax with one of Perma's high quality finish strippers. Mop up or vacuum the stripping solution and rinse floor thoroughly with clean water. Optimum performance and appearance is obtained with three coats of finish. Apply thin even coats, allowing the finish to dry for approximately 30-45 minutes, depending on humidity and temperature, between coats.

Effective recoating of existing finish may be achieved in the following manner: Dry mop the floor to remove any loose dirt or dust. Wash the floor with Sunrise to remove fine dirt and soil and allow it to dry. Apply thin even coats, allowing the finish to dry for approximately 30-45 minutes between coats.

A routine maintenance program will provide the most satisfactory gloss retention and wear characteristics in any floor coating. Floor surfaces should be swept with a dry mop treated with Aqua Treat. Floors should be damp mopped daily with Sunrise to maintain Blue Sky's odor counteractant properties and remove soil, salt, and film deposits which can degrade a coating's gloss.

SPECIFICATIONS

Nonvolatile Solids	19 ± 0.6%
Total Active	25%
pH	8.5 - 9.0
Gloss 60°	88-92 @ 3 coats
Color	Translucent white
Weight Per Gallon	8.55
Slip Resistance (ASTM)	0.5 minimum
Stability	1 year minimum at room temperature
Freeze/Thaw Stability	3 cycles minimum
Drying Time	30 - 45 minutes
Water Resistance	Excellent
Gallon Coverage (Feet ²)	2000 ± 10%
Removability (Gardner)	75 cycles maximum

SAFETY INFORMATION

Health	1
Flammability	0
Reactivity	0
Personal Protection	B

This material is not a hazardous mixture as defined in 29 CFR 1919, 1200 and M.G.L. c. 111F. Safety glasses and gloves should be worn during application and handling. If ingested, drink milk, water, or fruit juice and induce vomiting with oil of ipecac. In the event of eye contact, flush area with water for 15 minutes. **Consult with a physician.** For detailed information, consult MSDS sheet.
