

HOT SPOT™

Carpet Spotter/Prespray/Bonnet Cleaner

**Gets Out The
Toughest Stains!
Product #138**

PRODUCT DESCRIPTION

Hot Spot's combination of detergents and emulsified natural solvents effectively removes most types of petroleum-based soils, oily food stuffs, animal matter, proteins, starches and sugars. Full strength or diluted 1:1 Hot Spot is an effective spotter or carpet prespray. Diluted 13 ozs. per gallon of water, Hot Spot is effective as a bonnet-buffing solution even on heavily soiled carpets. When used in a routine bonnet-buffing program, Hot Spot removes stains and soil from heavy traffic areas. Hot Spot is nontoxic, noncorrosive and is biodegradable.

APPLICATION & MAINTENANCE

Although this product is safe for use on most types of industrial carpets, spot pre-testing for color fastness is advisable.

For Use As A Spotter Or Pre-spray: Thoroughly vacuum the area to be cleaned. Scrape off any hardened soil with a putty knife or scraper. Using a coarse spray apply the material directly onto the heavily soiled area or stain with a solvent resistant trigger or pressurized sprayer. Allow the material to work for approximately 5-10 minutes. Removal of stubborn stains may require gentle scrubbing with a medium stiff bristled brush in a circular motion. Proceed with normal extraction cleaning procedures.

For Use In Bonnet Buffing: Thoroughly vacuum the area to be cleaned. Dilute 13 ozs. material per gallon of water. Apply the solution to approximately 100 ft² of carpet in a coarse mist using a trigger or pressurized sprayer. Allow the solution to stand for 5-10 minutes to dissolve and loosen the soil. Soak two carpet bonnets in a bucket of clean water. Remove one bonnet from the bucket and wring out any excess water. Place the bonnet under a 175 Rpm floor machine. Begin cleaning by outlining the area to be cleaned and then continue using overlapping side to side strokes. As the bonnet becomes soiled, it should be turned over. When both sides become soiled the first bonnet should be rinsed out and returned to the bucket to soak while the cleaning procedure is continued with the second bonnet. This procedure should be repeated in a direction perpendicular to the first procedure.

SPECIFICATIONS

Active Ingredients	Surfactants, Water
	Miscible Solvents
pH	7.5 ± .5
Free Ammonia	None
Free Acid	None
Phosphates (Elemental)	Trace Amount
Abrasives	None
Color	Faint Yellow
Odor	Lemon
Solubility in Water	Complete
Freeze/Thaw Stability	3 Cycles Minimum
Shelf Life	1 Year Minimum
Flash Point	160° F
Weight Per Gallon	8.2
Biodegradable	Yes
Soil Suspension	Excellent

SAFETY INFORMATION

Health	1
Flammability	1
Reactivity	0
Personal Protection	B

CAUTION: Contains detergents, alcohol and ether solvents. May cause irritation in undiluted concentrations. Atomized mist may cause irritation to nasal passages. If ingested, give milk. Seek immediate medical attention. For external contact, flush with water. In the event of eye contact, flush with plenty of clean water. Seek immediate medical attention. For complete information consult MSDS Sheet.
