

SCOOT™

Bacterial Enzyme Digester

Up to 220 Billion
Bacteria in Each Gallon!
Product #810

PRODUCT DESCRIPTION

Scoot, an environmentally safe biochemical treatment, contains selected non-pathogenic bacterial strains. When used in a consistent maintenance program, Scoot will effectively metabolize and remove grease, fats, oils, proteins, starches, cellulose, and detergents from carpets, ceramic tile, grout, concrete, grease traps, refuse storage areas and even dumpsters. The 55 billion bacteria present in each quart of Scoot produce specific enzymes that degrade organic waste, neutralize odors, lower biological and chemical oxygen demand and reduce suspended solids levels. Containing no acids, caustics, or solvents Scoot can be safely used around the metal, ceramic, and plastic components of sanitary systems in commercial, industrial and office buildings, hospitals, nursing homes, restaurants, food and meat preparation facilities, and municipal, residential, and agricultural waste treatment plants.

APPLICATION & MAINTENANCE

Optimum results require the establishment of a regular application schedule. During the initial development of an effective bacterial colony twice the normally scheduled amount of treatment should be applied. Normal maintenance applications should be administered as follows:

To eliminate Feces, Urine and other organic soils from synthetic fiber carpets, simply apply SCOOT full strength to the effected areas and keep moist by misting with clean water, or covering with a plastic bag or sheet, until soils are digested and eliminated.

To eliminate urine and organic soils from ceramic tile or concrete in restrooms, kitchens, food processing areas, etc. dilute SCOOT 3-4 ounces per gallon of cold water and apply

with a pressurized or trigger spray or with a damp mop as part of the routine cleaning and maintenance program.

For Drains, Dishwashers, Garbage Disposals, Floor Drains, and Urinals - Add 4 ounces weekly.

For Grease Traps - Add 4 ounces daily for every 20 cubic feet of capacity.

Do not expose to temperatures above 120° F. Keep out of direct sunlight. Avoid contact with skin, and eyes. Do not subject material to disinfectants, hot water, or bleaches.

SPECIFICATIONS

Active Ingredients	Bacterial cultures, count= 5×10^7 minimum vegetative cells/ml (185-220 billion/gal.)
pH	7.0
Color	Light Pink
Odor	Raspberry
Solubility in Water	100%
Active Temp. Range	55° - 110° F
Active pH Range	6 - 8.5
Shelf Life	1 year minimum @ 50-70° F
Weight Per Gallon	8.5
Biodegradable	Yes
Enzymes Produced	Amylase, protease, lipase, cellulase

SAFETY INFORMATION

Health	1
Flammability	0
Reactivity	0
Personal Protection	B

This material is not a hazardous mixture as defined in 29 CFR 1910, 1200 and M.G.L. c. 111 F.

CAUTION: Contains active bacterial cultures. May cause irritation in undiluted concentrations. If ingested, give water, lemon or orange juice. Induce vomiting with oil of ipecac. External contact, flush with water for 15 minutes. In the event of eye contact, flush with plenty of clean water. **Contact physician.** For complete information consult MSDS Sheet.

Do not expose to temperatures above 120° F. Do Not Freeze. Keep out of direct sunlight. Keep containers closed. Avoid contact with skin, and eyes. Do not subject material to disinfectants, hot water, or bleaches.
