

WATERLESS CLEANER

Solvent Based, Cleaner/Degreaser For Wood Floors

Waterless Cleaner is a solvent-based cleaner for wood and concrete surfaces. Waterless Cleaner does a great job when used to tack or clean and degrease flooring surfaces before applying polyurethanes or solvent-based finishes. Waterless Cleaner may also be used as a dust mop treatment or for damp mopping in the routine cleaning of wood and concrete surfaces. Waterless Cleaner is excellent at dissolving oils, grease, hydraulic fluid, and removing black heel and tire marks. Waterless Cleaner reduces the chances for darkening and raised grain on wood floors, which can happen with water-based cleaners.

APPLICATION & MAINTENANCE

ROUTINE DRY MOPPING: Apply approximately two ounces of Waterless Cleaner on the dusting surface of a dry mop or similar sweeper. Allow mop to stand for thirty minutes. Sweep floor in the direction of the wood grain or length of the aisle. Shake out the dry mop at the end of each stroke.

HEAVY SOILING: For extremely dirty floors use four ounces of Waterless Cleaner on a dry mop, towels, or rags and apply as above. Waterless Floor Cleaner may also be applied with a string mop. Pour Waterless Cleaner into a wringer bucket, dampen a clean string mop with material, and wring out excess. Clean floor surface with a side to side sweeping motion. To remove black heel marks or spots, dampen a piece of cloth or blue scrubbing pad and wipe clean with a few strokes.

FLOOR FINISHING: Waterless Cleaner is also ideal for removing soiling and dust when applied to a tack rag prior to sealing floors. Equipment and applicators are easily cleaned with Waterless Cleaner, greatly reducing the problems and mess normally associated with cleanup following sealer application.

SPECIFICATIONS

Active Ingredients	100% Refined hydrocarbon distillates and water soluble solvents
Flash Point	105° F.
Color	Clear
Silicones	None
Mineral Oils	None
Separation	None
Stability	1 year minimum at room temperature
Weight Per Gallon	6.5 - 6.6

SAFETY INFORMATION

Health	1
Flammability	2
Reactivity	0
Personal Protection	B

DANGER: Harmful or Fatal if Swallowed. Contains Stoddard Solvent, CAS#8052-41-3. For external contact or contact with eyes, blot up material with a towel then flush with large volumes of clean water. If swallowed, drink olive oil, egg whites, or milk of magnesia. **Do Not Induce Vomiting. Call Physician Immediately. Avoid Prolonged or Repeated Contact.**

COMBUSTIBLE: Keep away from heat and open flame. Close container after each use. Provide adequate ventilation. Read MSD Sheet thoroughly before using.
